Native speaker

## HOBBIES

- Game  
PS5, NSW2, Steam
- Boardgame
- Coding  
Open Source Lover
- Music, Anime, Movie

# Tanawat Pinthongpan

## Full-Stack Developer

Results-driven Full-Stack Developer with a proven ability to design and build scalable web applications using Next.js and modern backend architectures. I actively integrate AI-driven development practices to maximize efficiency. I combine my technical expertise with a friendly and communicative approach to drive the delivery of high-quality products.

## EXPERIENCE

### Full-Stack Developer

Jan 2021 – Present

#### Eazy Digital

- **Results-Driven Full-Stack Developer:** Proven ability to design and build scalable web applications.
- **Modern Tech Stack:** Experienced in developing with Next.js and modern backend architectures.
- **AI-Driven Efficiency:** Actively leveraging AI tools and practices to optimize workflows and maximize productivity.
- **Collaborative Team Player:** Combining technical expertise with a friendly, communicative approach to actively contribute to high-quality products.

### Senior Software Developer

Feb 2023 – Dec 2024

#### Appman

- **Full-Stack Development:** Engineered robust applications and reusable web components for the "Agentmate Core" (Insurance agency support system) using React.js (TypeScript) and Node.js.
- **Cross-Functional Collaboration:** Partnered closely with Business Analysts (BA) and UX Designers to translate complex business requirements into intuitive, user-friendly features.
- **System Optimization:** Refactored existing codebases and streamlined deployment pipelines to improve system performance, stability, and release efficiency.
- **Technical Problem Solving:** Proactively researched and integrated new technologies to resolve complex technical challenges and support the team's workflow.
- **Team Contribution:** Acted as a key technical contributor within the development team, sharing knowledge and fostering a collaborative environment.

## Senior Software Developer

Aug 2020 – Jan 2023

### Magicbox Solution

- **Full-Stack & Mobile Development:** Engineered comprehensive solutions for core systems including "Fixtab", "MBS API", and "Vich" utilizing React.js, React Native, and Node.js with TypeScript.
- **Database & Cloud Infrastructure:** Designed and maintained relational databases (MySQL) and managed scalable cloud deployments using Docker, Kubernetes (K8S), and AWS.
- **Process Optimization:** Refactored legacy codebases and improved deployment pipelines to enhance system performance, stability, and release efficiency.
- **Cross-Functional Collaboration:** Partnered with Business Analysts (BA) and UX/UI Designers to translate business requirements into seamless user experiences.
- **Technical Problem Solving:** Actively researched and integrated new technologies to resolve unique technical challenges and support the development team.

## Full-Stack Developer

Nov 2019 – Jul 2020

### True Corporation

- **Microservices & Full-Stack Development:** Engineered scalable full-stack applications and maintained a complex microservices architecture using Node.js, Golang, and MySQL.
- **Enterprise Core Systems:** Developed critical data-intensive systems, including a centralized organization-wide logging system (MBX-COL) and a user cashback management service (TOLX) utilizing Elasticsearch.
- **System Observability:** Implemented comprehensive system monitoring, data visualization, and log management using Grafana and Kibana to ensure system health and reliability.
- **Cross-Functional Collaboration:** Partnered closely with Business Analysts (BA) and System Analysts (SA) to translate complex business requirements into effective technical solutions.
- **Continuous Improvement:** Enhanced system stability and release efficiency by refactoring codebases and actively streamlining deployment processes.

## Full-Stack Developer

Oct 2018 – Oct 2019

### 3DS Interactive

- **Full-Stack & System Architecture:** Developed and maintained diverse scalable platforms, including an AI marketing tool (PAM4), a centralized API routing CMS, and a client-facing payment management system (for Sansiri) using Vue.js and Golang.
- **Advanced Data Processing:** Engineered high-performance backend systems and data pipelines utilizing Elasticsearch, Apache Kafka, and Redis.
- **Cloud Infrastructure:** Managed robust and scalable containerized deployments utilizing Docker and Kubernetes (K8S).
- **Cross-Functional Collaboration:** Partnered extensively with Product Owners (PO), Analysts (BA/SA), and QA engineers to ensure seamless project delivery and alignment with business requirements.
- **Continuous Technical Growth:** Proactively researched and adopted emerging technologies to resolve complex technical challenges across multiple high-impact projects.

## Full-Stack Developer

May 2017 – Sep 2018

### P-Soft

- **Full-Stack Development:** Engineered web applications for high-profile government and enterprise clients (e.g., Ministry of Public Health, Land and Houses) using Angular 6, PHP (Laravel, Phalcon), and .NET Core (C#).
- **Database Management:** Designed, implemented, and managed complex data systems across diverse relational and NoSQL databases, including PostgreSQL, Oracle DB, and MongoDB.
- **Cross-Functional Collaboration:** Partnered closely with Business Analysts (BA), System Analysts (SA), and UX Designers to translate complex requirements into effective software solutions.
- **Technical Adaptability:** Demonstrated strong versatility by continuously learning and integrating multiple programming languages and frameworks to overcome unique project challenges.

## EDUCATION

---

**Rajabhat University, Nakhon Si Thammarat**

2012 – 2016

Bachelor's Degree in Computer Science
